Lending Pricing Data

Rate Surveys to Understand Comparative Price Position

Comprehensive insight into your relative pricing position.
Seamlessly compare your price position against your competitors
across mortgage, home equity and consumer lending verticals.

WHAT YOU CAN MEASURE

With pricing data sourced directly from lenders in our “give-to-get” business model we are the trusted partner of choice for daily monitoring and effective pricing strategies.

Timely, Granular Data – Weekly loan origination data and reporting with transaction-level application, approval and booking details.

Actionable Metrics – Key lending performance metrics, including market demand, market share, operational efficiency, price position, risk profile/ business mix and price exceptions.

Flexible Delivery Model – Gain direct access to the data base for customized views and advanced analytics, utilize a powerful platform for high-level views or read the weekly push report.

SOLUTION HIGHLIGHTS

Loan Attribute Price Adjustments
Detailed pricing adjustments for Loan Purpose, Loan Amount, Credit Score, LTV and commitment period.

Customizable Content
Historical trending, batch reporting for multiple scenarios, and advanced features to track pricing strategy against named competitors.

Flexible Access to Support Your Needs
Standard reports for daily monitoring, online tools for ad hoc scenario analysis, data feeds to support internal modeling.

“My team leverages the various market analytics platforms that Curinos offers when calibrating our pricing to ensure we’re maintaining a competitive edge in our key markets. When it comes to competitive benchmarking and overall market analytics in Real Estate lending, the solutions offered by Curinos are second to none!”
